

Development of the South African National Climate Change Adaptation Investment Plan

Project Launch

3 August 2023

forestry, fisheries
& the environment

Department:
Forestry, Fisheries and the Environment
REPUBLIC OF SOUTH AFRICA

Welcome Message and Introduction

- Importance of investing in adaptation for South Africa
 - Vital to protect the country's people, economy, and natural resources from the impacts of climate change. It provides an opportunity to foster sustainability, social equity, and economic resilience in the face of an uncertain climate future.
- Developing a national climate change adaptation investment plan, with coordination at the provincial and local levels
- Support from NDC Partnership and collaboration with Genesis Analytics

Welcome Message and Introduction

- Learning from the JET IP (Just Energy Transition Investment Plan) which is a distinct but connected strategy.
- Lessons from the development of the JET IP which are relevant for the Adaptation IP include:
 - Inclusivity and stakeholder engagement
 - Integration with existing policies
 - Prioritization and sequencing
 - Funding and resource mobilization
 - Monitoring and evaluation
